 - a. Homepage
 - i. **Tier** Tier Flow will be displayed on the home screen with the following logic where 1 point = 0.5 Rs (and is configurable from the admin)
 - ii. **My points** Displays the total points that a user has accumulated over time. These points will be earned through purchases, booked tickets, and online store shopping.
 - iii. **My Cashback** Displays the cashback the user has earned, through purchases or specific promotional activities from the mentioned platforms.
 - iv. **Active Coupons** section provides users with a list of currently available coupons or offers that can be redeemed using points, cashback, directly through their payment accounts.
 - v. **Scratch and win** The user can scratch the cards and can see available coupon codes and cashback on the system.
 - vi. **Deals nearby me** - **View in AR**
 - vii. **Most popular offers** Top 10 offers will be listed in horizontal scroll wrt. The highest discount available in the system.
 - viii. **Today's Deals** Deals added today by the partners will be listed here, if there are none, display the latest deals added by the partners.
 - ix. **Popular categories** The most bought category will come here in this section.
 - b. My points detail
 - c. Most popular offers detail

- d. Today's deals detail
- e. Deals nearby me detail
- f. Popular category detail

User Definition :-

User Type	Who Are They?	Permissions & Responsibilities	Access Level
Admin Users	Super Admin, Admin, Sub-Admin	Manage users, deals, analytics, and partners	Full Admin Panel Access
Partner Users	Merchants, Vendors	Manage their own deals, and customer engagement	Limited Merchant Dashboard Access
Customer Users	General app/web users	Browse and redeem deals, earn rewards	No Access to Admin Panel

1.0 Admin Portal

The Admin Portal is the central hub for managing users, partners, deals, and monitoring system analytics. It provides administrators with tools to oversee platform activities, enforce security policies, and ensure smooth operations.

1.1 User Management

Purpose:

The User Management feature allows administrators to create, edit, update, and delete users who have access to the platform.

Key Features:

1.1.1 Create Users

Process:

1. Navigate to the **User Management** section.
2. Click on **“Add New User.”**
3. Enter the required user details:
 - **Name:** The user’s full name.
 - **Email:** The user’s email address (used for login) - primary identifier.
 - **Phone Number:** Contact number of the user.
 - **Status:** Active/Inactive.

4. Click on **Save** to create the user.

Note:

- The user receives an activation email to set their password and complete the registration process.

1.1.2 Edit Users

Process:

1. Select the user from the **User List**.
2. Click on “**Action > Edit.**”
3. Update editable fields:
 - **Name:** The user’s full name.
 - **Email:** The user’s email address (used for login) - primary identifier.
 - **Phone Number:** Contact number of the user.
 - **Status:** Active/Inactive.
4. Click on **Save** to apply the changes.

Additional Feature:

- **Login as User:**
 - Admins may have an option to log in as a user to troubleshoot issues or verify user experience. (TBD - To be determined)

1.1.3 Delete Users

Process:

1. Select the user from the **User List**.
2. Click on “**Delete.**”
3. Confirm the deletion action.

Note: Deleting a user will remove their access permanently unless re-created.

1.1.4 Bulk Upload Users

Process:

1. Upload a CSV file containing user details.
2. Ensure the file has the following column headers:
 - **Name:** The user’s full name
 - **Email:** The user’s email address (used for login) - Optional
 - **Phone Number:** Contact number
 - **Status:** Active/Inactive
3. The system will validate and import the users.

Note: Bulk upload allows administrators to onboard multiple users efficiently without manual entry.

1.2 Partner/Merchant Management

Purpose:

The Partner Management feature allows administrators to manage partner accounts, including creating, editing, updating, and deleting partners.

Key Features:

1.2.1 Filters & Analytics

- Country Filter

- **Date Range Filter**
- **View Analytics**
 - Bar graph showing:
 - Pipeline
 - Integration
 - UAT
 - Live Merchants
 - New Coupons added
 - New Merchants onboarded
 - New Products onboarded

1.2.2 Merchant Listing

- **Merchant ID**
- **Merchant Name**
- **Business Model**
- **Affiliate Marketing - Type 1:** Unique coupons and deals shared by the partner.
- **Affiliate Marketing - Type 2:** Fetched general coupons and deals shared by the partner on their web/app.
- **Coupons/Deals Live** (within the campaign date)
- **Country**
- **Creation Date**
- **Activation Date**
- **Deactivation Date**
- **Status**
- **Pipeline:** Live Merchant, UAT, Integration
- **Option to Apply Changes**

1.2.3 Merchant Actions

- **Deactivate Merchant**
- **Edit Merchant**
- **Delete Merchant**
- **Login as Merchant**
- Admins can onboard new merchants, edit their details, or remove them from the system.

1.2.4 Create Partners

Process:

1. Navigate to the **Partner Management** section.
2. Click on **“Add New Partner.”**
3. Fill in the partner details:
 - **Company Name:** The partner’s business name.
 - **Company POC Name**
 - **Email ID**
 - **Mobile Number**

- **Company Address**
- **Business Type:** Select from a list of categories (e.g., Retail, Food & Beverage, E-commerce TBD).
- **Company Identification**
 - Company PAN Card
 - Corporate Identification Number
 - Company Address Proof
 - Company Purchase Order

4. Click on **Save** to send partner activation details.

1.2.5 Edit Merchant/Partners

Editable Fields:

- **Company Name**
- **Company POC Name**
- **Email ID**
- **Mobile Number**
- **Company Address**
- **Business Type**
- **Status**
- **Pipeline:** Live Merchant, UAT, Integration
- **Option to Apply Changes**

1.2.6 Update Partner Status

- Partners can be activated or deactivated.
- Deactivated partners will no longer be able to create or manage deals.

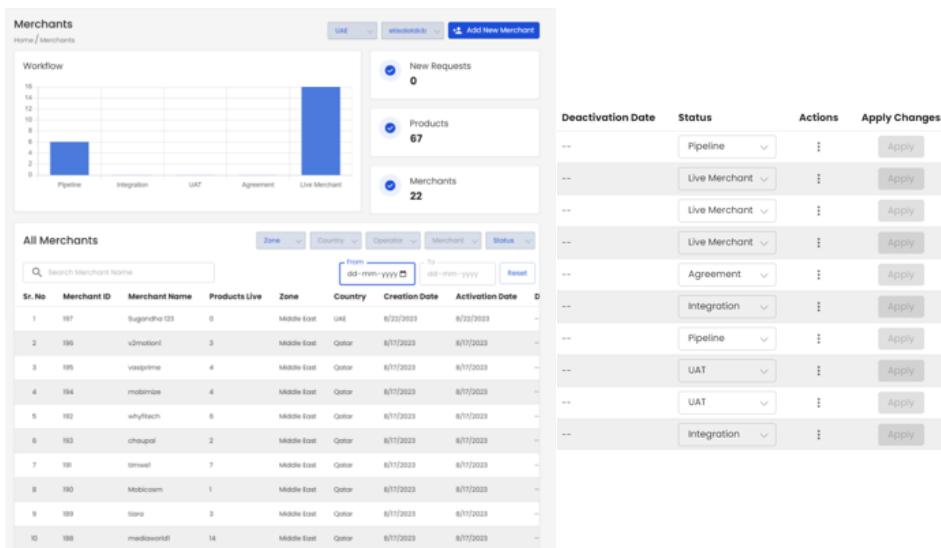

1.2.7 Delete Partners

Process:

1. Select a partner from the list.
2. Click on **“Delete.”**
3. Confirm the deletion action.

1.2.8 Future Enhancements

- **Partner/Merchant Specific Campaigns:** Set up offers and deals specific to each partner. (TBD)
- **Revenue/Performance Tracking:** Access reports to evaluate merchant performance, including transaction volume and customer engagement. (TBD)

1.3 Product Management

Purpose:

The Product Management module enables the creation of products that will be associated with various deals. Admins can manage a list of products, categorize them, and create deals from these products.

Key Features:

1.3.1 Add Product List

Process:

1. Navigate to the **Product Management** section.
2. Select **Merchant/Partner** from the list.
3. Choose between:
 - **Add a Single Product**
 - **Bulk Upload Products** via CSV.
4. **For Single Product Entry:**
 - Enter **Product Name** (Unique identifier).
 - Select **Category** from existing ones or create a new one.
 - If creating a new category, the system redirects to **Category Management**.
 - Add category name and save.
 - Provide a **Description** of the product.
 - Specify **Price per Unit**.
 - Upload **Product Images**.
 - Set **Quantity Available**.
5. Click on **Save** to store the product.

Bulk Upload Feature:

- Admins can upload multiple products using a CSV file.
- Required CSV format includes:
 - **Product Name**
 - **Category**
 - **Price**
 - **Description**
- The system validates and imports products into the platform.

1.3.2 Edit Products**Process:**

1. Select the product from the **Product List**.
2. Click on **“Edit.”**
3. Update fields as necessary:
 - Product Description
 - Product Image
 - Quantity Available
 - Price
 - Change Category
4. Click on **Save** to update the details.

1.3.3 Delete Products**Process:**

1. Locate the product in the **Product List**.
2. Click on **“Delete.”**
3. Confirm the action.

Note:

- A product can only be deleted if it is not associated with any active deals.
- If a deal is active for a product, an error message appears: **“[Deal Name] is already active for this product. Please delete the deal to remove this product.”**

1.3.1 Category Management

Purpose:

The Category Management module allows administrators to create and organize categories for their products. Proper categorization improves product discoverability and enables better deal management.

Key Features:

1.3.1.1 Create Categories

Process:

- Navigate to the **Category Management** section.
- Click on **“Add New Category.”**
- Enter the required details:
 - Category Name:** A unique name for the category.
 - Description:** A brief summary of the category.
 - Category Image:** Upload an image to visually represent the category.
- Click **Save** to create the category.

Note:

- Categories help in organizing products effectively and should be descriptive and precise.
- Duplicate category names are not allowed.

1.3.1.2 Edit Categories

Process:

1. Select a category from the **Category List**.
2. Click on “**Edit**.”
3. Modify the details:
 - Update **Category Name**.
 - Modify the **Description**.
 - Change or upload a new **Category Image**.
4. Click **Save** to apply the changes.

Note:

- Any changes will reflect across all associated products.

1.3.1.3 Delete Categories

Process:

1. Select a category from the **Category List**.
2. Click on “**Delete**.”
3. Confirm the deletion action.

Note:

- A category cannot be deleted if it is associated with active products or deals.
- If deletion is attempted, an error message will appear: “**This category is associated with existing products. Please reassign or remove products before deleting.**”

1.3.1.4 Assign Products to Categories

Process:

1. Navigate to the **Category Management** section.
2. Locate the product and its current category.
3. Use either:
 - **Drag-and-Drop Interface:** Move products between categories visually.
 - **Bulk Action Tool:** Select multiple products and assign them to a category in bulk.
4. Click **Save** to finalize category assignments.

Note:

- Products can belong to multiple categories if required.
- Proper classification enhances user search experience and improves platform efficiency.

1.4 Deal Management -

<https://www.figma.com/design/cQDR9w2FtnQ0glkRrZY6uD/Reward-Panel?node-id=2013-164567&node-type=section&t=FwxUvwn1hPx9ythk-0>

Purpose:

The Deal Management feature allows admins to create, modify, and delete deals that are linked to specific products and partners. This module also handles deal scheduling and expiry notifications.

Key Features:

1.4.1 Create Deals

Process:

1. Navigate to the **Deal Management** section.
2. Click on “**Add New Deal.**”
 - **Note:** There must be at least one product and category created before a new deal can be added.
3. Select a product from the **Product List**.
4. Set the **Deal Details**:
 - **Deal Name:** The title of the deal.
 - **Discount Type:** Choose between percentage-based or fixed discount.
 - **Discount Value:** Enter the discount amount.
 - **Start Date/Time:** Define when the deal will go live.
 - **End Date/Time:** Define when the deal will expire.
5. Assign the deal to a **Partner**.
6. Assign the deal to a **Category**.
7. Select multiple products (if applicable).
8. Set the **Visibility** options (e.g., Featured Deal, Homepage Deal, Today's Deals).
9. Click on **Create** to save the deal.

1.4.2 Edit Deals

Process:

1. Select a deal from the **Deal List**.
2. Click on “**Edit.**”
3. Modify the necessary fields:
 - Adjust discount values.
 - Change the start/end dates.
 - Update the deal visibility.
4. Click **Save** to apply the changes.

Note:

- Edits should not conflict with active deals.
- Any change in deal structure should be notified to the partner.

1.4.3 Deal Expiry and Notifications

Automated Notifications:

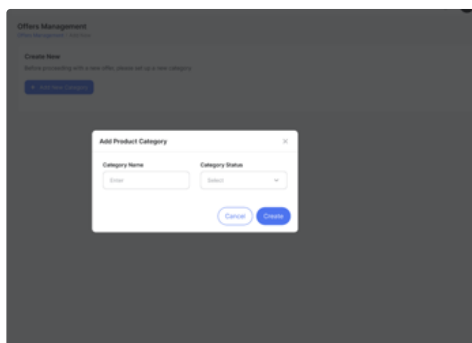

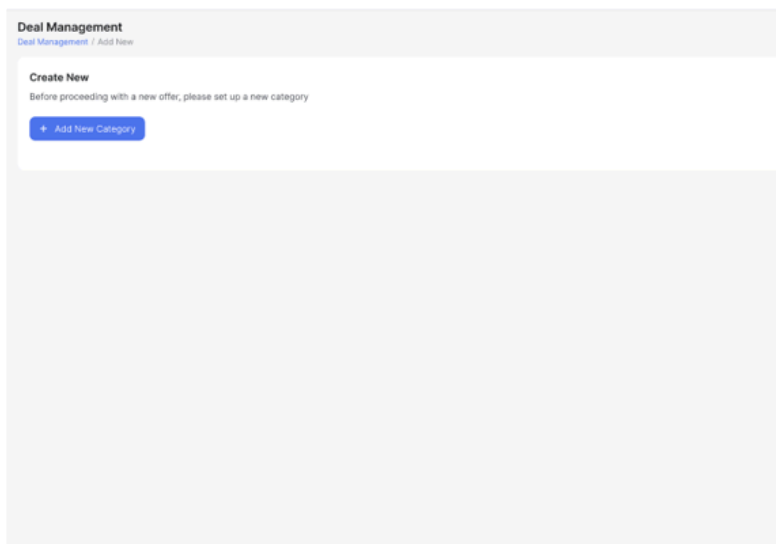

- Deals that are about to expire trigger an automatic notification to both the admin and partner.
- Expiry reminders will be sent via email and dashboard alerts.

Admin Actions:

- Admins can either **extend**, **terminate**, or **modify** deals based on performance.
- If a deal is performing well, it can be extended with revised discount values.
- Expired deals are automatically removed from the active deals section.

Note:

- The system ensures that expired deals do not appear in the active deal listings.
- If a deal is manually terminated before its expiry, it will be removed immediately.

1.7 Dashboard and Analytics

Purpose:

The Dashboard and Analytics module provides a comprehensive overview of platform activity, deal performance, and user engagement. This enables data-driven decision-making for platform optimization.

Key Features:

1.7.1 Dashboard Overview

Metrics Displayed:

- **Total Active Users:** Number of active users on the platform.
- **Active Deals:** Number of live deals.
- **Top-Performing Partners:** Partners generating the most revenue.
- **Top Categories:** Most popular product categories.

1.7.2 Detailed Analytics

Data Insights Available:

- **Partner Performance Reports:**
 - Total sales generated by each partner.
 - Overall deal performance.
- **Product Performance Analysis:**
 - Most redeemed products.
 - Conversion rates.
- **Deal Analytics:**
 - Redemption rates.
 - Revenue generated from deals.
- **User Behavior Analytics:**
 - Most active users.

- Engagement trends.

1.7.3 Exportable Reports

Data Export Options:

- Admins can export data in **CSV or PDF formats** for deeper analysis or external reporting.
- Reports can be scheduled for automated exports at specified intervals.

2.0 Partner/Merchant Management

The Partner/Merchant Management System consists of modules for **Dashboard and Analytics, Product Management, Category Management, and Deal Management**. These modules provide merchants/partners with complete control over their promotions and visibility into the performance of their products and deals.

2.1 Dashboard and Analytics

Purpose:

The Dashboard and Analytics module provides merchants with insights into their deal performance, tracking key metrics such as user clicks, checkouts, and engagement rates.

Key Features:

2.1.1 Performance Overview

- **Date Range Selection:** Merchants can filter analytics by custom date ranges (e.g., last 7 days, last month, last 6 months, or a custom calendar selection).
- **Metrics Displayed:**
 - **Total Active Deals:** Number of ongoing deals.
 - **Total Clicks on Deals:** Unique count of clicks on each deal.
 - **Total Checkouts:** Number of purchases resulting from deal redirection.
 - **Total Revenue Generated from Deals:** Total sales revenue.

2.1.2 Deal Performance Analysis

- **Clicks per Deal:** Track the total number of clicks each deal has received.
- **Conversion Rates:** Percentage of users who clicked a deal and proceeded to checkout.
- **Revenue Generated:** Total sales generated from each deal.

2.1.3 User Engagement Metrics (*Bar Graph Visualization*)

- **User Clicks on Deals:** Tracks how many users clicked on each deal.
- **User Checkouts:** Monitors how many users completed a purchase after viewing a deal.
- **Bounce Rate:** Measures users who viewed a deal but did not proceed to checkout.

2.1.4 Real-Time Tracking

- **Live Dashboard:** Displays real-time engagement with deals, including:
 - Active deals

- Unique clicks
- Checkouts
- Revenue generation
- **Deal Maps:** Visual representation of the most interacted-with deals or products.

2.1.5 Exportable Reports

- Merchants can export detailed performance reports in **CSV** or **PDF** format for further analysis.

2.2 Product Management

Purpose:

The Product Management module enables partners to manage their products, associate them with deals, and organize them into categories.

Key Features:

2.2.1 Create New Product

Steps:

1. Navigate to the **Product Management** section.
2. Click on “**Add New Product.**”
3. Enter product details:
 - **Product Name:** Unique product title.
 - **Product Description:** Brief product overview.
 - **Price:** Standard or discounted price.
 - **SKU:** Unique identifier.
 - **Product Image:** Upload one or multiple images.
 - **Category:** Select an existing category or create a new one.
4. Click **Save** to store the product.

2.2.2 Edit Product

Steps:

1. Select a product from the **Product List**.
2. Click “**Edit.**”
3. Modify product details (e.g., price, description, images, SKU).
4. Click **Save** to apply changes.

2.2.3 Bulk Product Upload

- Partners can upload multiple products using a CSV file.
- Required CSV columns: **Product Name, Price, SKU, Category.**

2.2.4 Delete Product

Steps:

1. Select the product from the **Product List**.
2. Click on “**Delete.**”
3. Confirm the action.

2.2.5 Product Availability Management

- Merchants can toggle product availability (e.g., **In Stock / Out of Stock**).

2.3 Category Management

Purpose:

The Category Management module allows partners to create, manage, and organize categories for their products.

Key Features:

2.3.1 Create Categories

Steps:

1. Navigate to the **Category Management** section.
2. Click on **“Add New Category.”**
3. Enter the category details:
 - **Category Name:** Unique name.
 - **Description:** Brief summary.
 - **Category Image (Optional):** Upload an image.
4. Click **Save** to create the category.

2.3.2 Edit Categories

Steps:

1. Select a category from the **Category List**.
2. Click **“Edit.”**
3. Modify details (e.g., name, description, image).
4. Click **Save** to apply changes.

2.3.3 Delete Categories

Steps:

1. Select a category from the **Category List**.
2. Click **“Delete.”**
3. Confirm the action.

2.3.4 Assign Products to Categories

- Partners can assign or move products between categories using a **drag-and-drop interface** or **bulk action tool**.

2.4 Deal Management

Purpose:

The Deal Management module allows partners to create, modify, and manage deals linked to their products. *Note: A product and category must be created first before a new deal can be added.*

Key Features:

2.4.1 Create Deals

Steps:

1. Navigate to **Deal Management**.

2. Click **“Create New Deal.”**
3. Select a **Product** or group of products.
4. Enter **Deal Details:**
 - **Deal Name:** Title.
 - **Discount Type:**
 - **Percentage-based:** Enter discount percent.
 - **Fixed Amount:** Enter discount value.
 - **Start & End Date:** Set deal duration.
 - **Visibility:** Mark as **Popular Deal, Homepage Deal, Local Deals.**
5. Click **Save** to create the deal.

2.4.2 Edit Deals

Steps:

1. Select a deal from the **Deal List.**
2. Click **“Edit.”**
3. Modify details (e.g., deal name, discount type, dates, visibility).
4. Click **Save** to update the deal.

2.4.3 Schedule Deals

- Deals can be scheduled with **Start/End Dates and Times.**
- A **countdown timer** for upcoming deals can be displayed.

2.4.4 Deal Expiry Notification

- Merchants receive **automatic notifications** when deals are about to expire.

3.0 User Portal (App and Web) -

<https://www.figma.com/design/dPrNMmw8DqX3MX83HVwx2X/Rewardz%2FApp?node-id=0-1&node-type=canvas&t=QFu8QJ0XOYTqjrng-0>

Purpose:

The User Portal (both App and Web) will enable users to **discover, collect, and redeem deals** from a range of partner merchants across various categories. Users will have access to loyalty tiers, cashback, points, active deals, and personalized offers.

Important Note: The platform will display deals added by **partners/admin** and fetched from other portals, offering users a consolidated listing of available deals.

3.1 Homepage

The homepage serves as the central hub for users, providing an overview of their loyalty status, points, cashback, active deals, and popular offers.

Key Sections on Homepage:

- **My Points:** Displays the total points accumulated from deals and offers.
- **My Cashback:** Shows cashback earned from purchases or deals.
- **Active Coupons:** Lists all available coupons for the user.
- **Scratch and Win:** Engages users with a gamified "scratch to reveal" feature to win coupons or cashback.
- **Deals Nearby Me:** Displays deals within a **10KM radius** based on the user's location.
- **Most Popular Offers:** A horizontal scroll of the **top 10 deals** with the highest discounts.
- **Today's Deals:** Highlights **newly added** or recently updated deals.
- **Popular Categories:** Displays the most purchased categories based on user activity.

3.2 Tier Flow and Points System (TBD)

Loyalty Tier Flow:

- Users will see their **loyalty tier (Bronze, Silver, Gold, Platinum, etc.)** along with their accumulated points.
- **Configurable Logic:** 1 point = 0.5 Rs (configurable via the admin panel).
- **Earning Mechanism:** Points are earned through purchases, bookings, and shopping activities.

3.3 My Points

Features:

- **Display:** Shows the total points accumulated by the user.
- **Earning Mechanism:** Points earned from shopping, purchases, and promotional activities.
- **Usage:** Points can be redeemed for **coupons, offers, and cashback**.
- **Detail View:**
 - Users can click to see a breakdown of earned points.
 - History of points usage or redemption.

3.4 My Cashback

Features:

- **Display:** Shows accumulated cashback through purchases or specific promotions.
- **Usage:** Cashback can be redeemed at checkout for eligible deals.
- **Detail View:**
 - Cashback history, including when and how it was earned and used.
 - **Cashback Expiry:** Cashback expires if unused within a certain period (configurable via the admin panel).

3.5 Active Deals/Coupons

Features:

- Displays **available coupons** for the user.
- **Filtering Options:** Users can filter coupons by **category**.
- **Redemption Process:** Users can **select and apply coupons** to relevant deals.

3.6 Scratch and Win

Gamified Rewards System:

- Users can scratch virtual cards to **reveal rewards** like **coupon codes or cashback**.
- **Daily Limits:** Users are limited to **one scratch per 24 hours**.
- **Reward Types:**
 - Cashback amounts.
 - Special deals or discounts.

3.7 Deals Nearby Me

Location-Based Offers:

- Uses **geolocation** to show deals near the user.
- **Deal Maps:**
 - Clicking a nearby deal shows **store details, deal validity, and redemption methods**.
 - The map covers a **10KM radius** with all active deals.
- **Partner Deals:** Includes deals from **local stores** within a **20KM radius**.

3.8 Most Popular Offers

Features:

- **Horizontal Scroll:** Displays the **top 10 most popular offers**.
- **Filter Options:** Users can filter deals by **category and discount percentage**.
- **Detail View:** Clicking an offer shows **full deal details**.

3.9 Today's Deals

Features:

- **Dynamic Updates:** Displays the latest **newly added** deals.
- **Time-Sensitive Deals:** Flash sales and limited-time offers.
- **Detail View:**
 - Shows deal duration.
 - Displays redemption options.

3.10 Popular Categories

Features:

- **Top Categories:** Displays the most **purchased or popular categories**.
- **Category Navigation:** Users can directly navigate to deals within each category.
- **Detail View:**
 - Shows **all available deals** within that category.

3.11 AR-Based Deal Finder

Augmented Reality Shopping Experience:

- **Users can scan nearby areas** using their smartphone camera to discover real-time offers.
- Deals and promotions are **overlaid onto the user's screen** in AR.

- This feature allows users to find **exclusive discounts at physical stores** while shopping.

3.12 Detail View – My Points, Offers, Deals, and Categories

Comprehensive Breakdown:

Each major section (e.g., **My Points, Most Popular Offers, Today's Deals, Deals Nearby Me, and Popular Categories**) will have a **detailed view** when users click on them.

Details Provided in Each Section:

- **History of Points/Cashback:** Users can see how they earned and redeemed points.
- **Full List of Offers:** Displays **all deals under that category or type**.
- **Nearby Deals & Maps:** Provides location details, including store information and directions.
